Relive by Living Edge

MARCH 2023

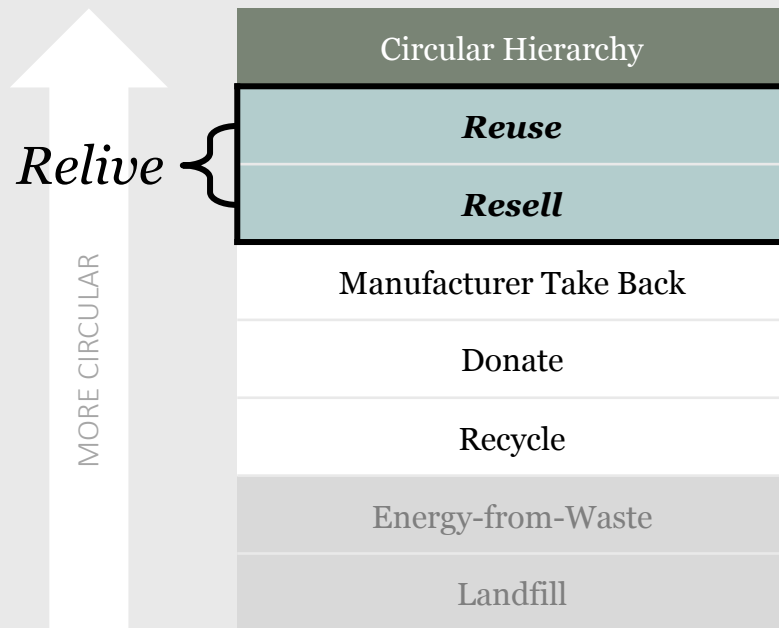

Relive by Living Edge

Relive is a sustainability program that aims to create a second life for authentic, original, and sustainable furniture.

Relive achieves this aim by enabling the reuse and resale of Living Edge products through:

- A **repair & refurbishment service** to help customers reuse their assets, and,
- A sales platform for pre-owned **Relive products**.

Relive aims to deliver the top two outcomes in the circular hierarchy of end-of-life outcomes; reuse and resell.

Repair & Refurbishment

Our repair & refurbishment service aims to extend the life of our products, and promote and facilitate reuse.

Living Edge has an established national network of specialist manufacturers, craftspeople, and contractors that can offer a wide range of repair and refurbishment services. Our consultants will work with you to understand how your existing products can be repaired or reconditioned to give them a new lease of life.

Relive Repair & Refurbishment Services

- Mechanical repairs
- Replacement parts
- Specialist cleaning
- Reupholstery
- Refinishing of timber, metal & stone
- Product modification & reconfiguration

Relive Products

We believe that our products have enduring value. Relive aims to reduce furniture to landfill by finding new users for pre-owned Living Edge products.

A Relive product is a Living Edge product that has been recovered from the commercial and residential furniture market through buy-back and take-back schemes, and professionally reconditioned for sale as a pre-owned product.

Relive Warranty

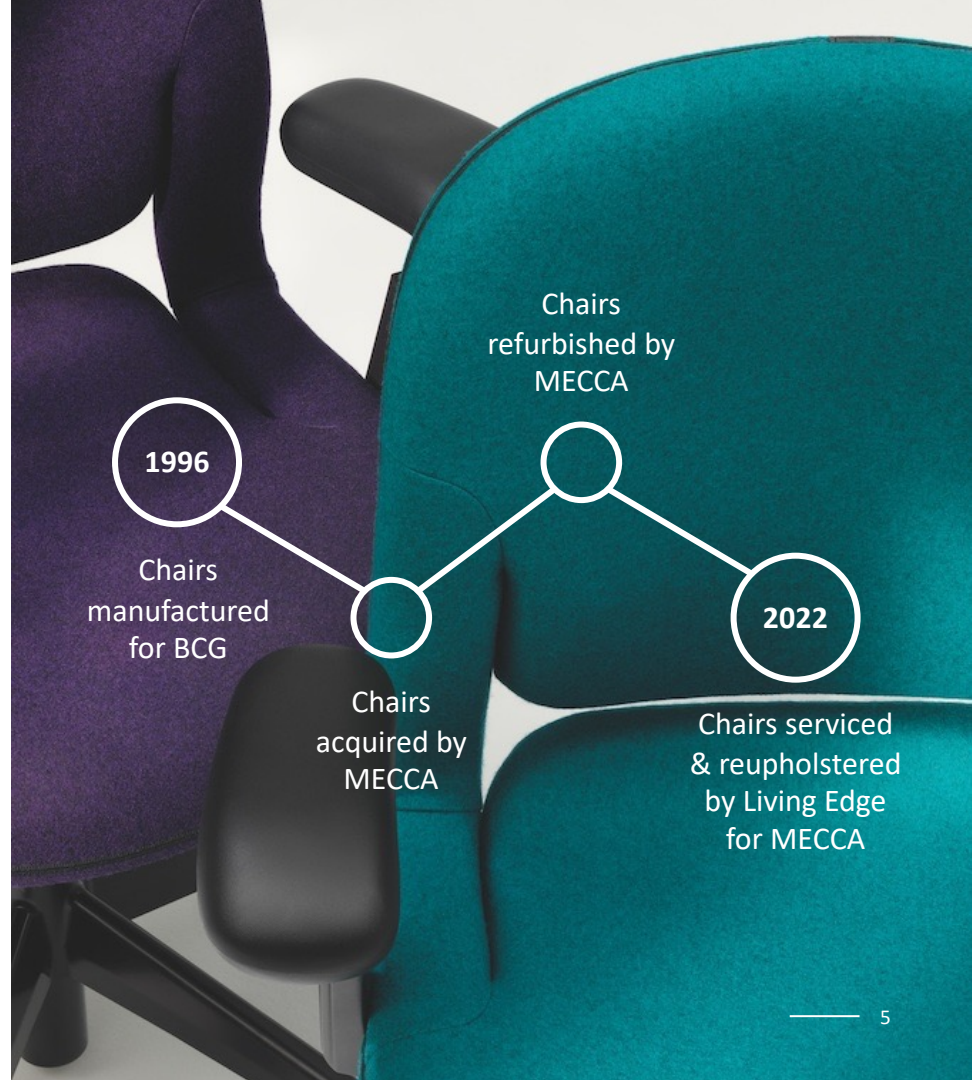

Relive products are supplied with a Relive warranty that is backed by Living Edge.

When a Living Edge product is resold, the original manufacturer's warranty cannot be transferred to the new owner – that's why commit to backing Relive products with our own Living Edge warranty. The length of the warranty is determined by the age and condition of the product and is agreed prior to sale.

The Value of Longevity: A Relive Case Study

Living Edge has recently 'relived' eighty 26 year old Herman Miller Equa chairs for MECCA.

In 2022, Living Edge helped MECCA, a leading Australian beauty brand, service and reupholster eighty Herman Miller Equa chairs for reuse at their stunning new Melbourne office. The 26 year old chairs were manufactured in 1996 and have already been through one significant refurbishment, making this their *third* lifecycle.

Thank you
