## SLAB TABLE 2400

### Process

Black and Natural - Made from finger-jointed oak, brushed to remove the softer parts of the wood leaving a very resistant surface which is clear lacquered or black pigmented. The visible natural grain of the wood exposes the character of the material.

Fumed - Large panels of finger jointed oak are laied into a fuming chamber which then creates the dark brown finish through the whole piece of wood. The panels are then sanded and cut and finished, then coated with a matte lacquer.
