Commercial Rainwater Tanks

HOME > COMMERCIAL & MINING RAINWATER TANKS > COMMERCIAL RAINWATER TANKS

Tanks for the Commercial and Mining Industry

Over recent years there has been a much higher demand for Rainwater Storage Tanks used in the Commercial Industry. This is due to a number a factors, being stormwater detention, rainwater harvesting, storage and reuse.

Most Commercial sites have maximised the land usage meaning that below ground is the only option for the Rainwater/Stormwater detention Tank. More often than not the Tank is in the car park, with heavy vehicular traffic. Each of our W8 Tanks comes with a site specific Engineers detail and installation certificate (if required).

Our Tank sizes range from 20,000 litres to 90,000 litres and quite often multiples are required. We have several Engineer designs which range from our Standard Tank which carries passenger vehicular traffic to a W8 wheel loading. Most importantly, we can Engineer design to suit any requirements. With our Tanks being constructed on site, we can customise all inlets and outlets to suit specific plumbing requirements.

Our Tanks are fast becoming a preferred option over the Humes RainVault System as our Tank is built as a complete unit unlike the Humes RainVault which requires joining and sealing of each of the sections. This increases plumbing costs and reduces its reliability with the numerous joins. The Humes RainVault is for non-potable Rainwater only which reduces its reuse potential. We are also very competitive in our pricing and our W8 wheel loading Tank is usually less expensive then the Humes RainVault System, making the decision to install our Tank the best option in every instance.

Our Tanks are constructed onsite and we travel all over Eastern Australia servicing all Industries including the Mining Industry.

Occupational Health and Safety

We have continually reinvested into our Business, ensuring that we have the Newest and Safest Equipment. We have spent the past 30 years refining our construction methods, reducing the manual handling of our large formwork, ensuring our Workers Safety.

Our Occupational Health and Safety practices and our Safe Work Method Statements etc., have been scrutinised by Government agencies and large National Commercial Builders and we have been commended on our Safe Work Place Practices, our SWMS, Equipment Maintenance and Certification.

Commercial and Public Works Tanks completed in recent years.

Customer	Tank
Sidney & Richardson	45,000 litre @ Country Energy Tenerfield
Cockram Constructions	45,000 litre W8@ Charles Sturt University, Wagga Wagga
Hogan & Sons	90,000 litre W8 @ Bunnings Singleton
Adco	90,000 litre W8@ Bunnings Tamworth
Swimplex Coffs Harbour	90,000 litres W8 @ Moree Swimming Pool
Arima	4 x 90,000 litre @ Armidale
Rawson Constructions	20,000 litre @ Charles Sturt University Dubbo
Tall Timbers	90,000 litre @ Kempsey
Bob Charley	2 x 90,000 litre @ Lake Innes Estate
John O'Neal	2 x 90,000 litre @ Country Energy Coffs Harbour
Lahey Constructions	4 x 90,000 litre + 2x20,000 litre @ Slim Dusty Centre Kempsey
Kempsey Adventist School	90,000 litre @ Kempsey
Robin Snow Constructions	90,000 litre @ Urunga Primary School
Northside Constructions	4 x 90,000 litre W8 @ Fredrickton Nursing Home
