Delkor

CALCIUM BATTERY

Delkor batteries are renowned as being one of the best quality batteries available anywhere in the world. Their state of art production facilities are backed up by a ridged and thorough quality control process. All Delkor batteries incorporate many patented and unique features and their comprehensive range includes automotive, commercial, deep cycle and recreation applications.

Delkor Calcium/Calcium

The **Calcium/Calcium** range uses a unique lead/calcium alloy to produce a heavy duty wrought plate able to with stand the most arduous conditions. Suitable for the majority of Australian and European vehicles as well as many commercial, agricultural and earth moving applications.

Delkor Silver/Calcium

The **Silver/Calcium** range has the added benefit of using a lead/calcium/silver alloy that adds increased performance and durability, particularly in extreme applications or high temperatures. The Silver/Calcium is an excellent choice for car enthusiasts and prestige car owners.

Delkor AGM Start/Stop

The **AGM** range uses Absorbed Glass Mat separators which reduce internal resistance, increased performance, cyclic abilities and are able to accept higher re-charge rates. The AGM range are ideal for start/stop vehicles as well as for high end luxury vehicles that have a high electrical load.
