Bathroom Renovations

In some cases, owners opt to renovate their bathrooms, finding that a complete renovation is more cost-effective and practical than solely repairing the leak. This approach not only saves them thousands of dollars but also maximizes efficiency since their shower or bathroom is already out of commission during the repair process. By combining the repair and renovation, owners can achieve a comprehensive solution that addresses both the leak and enhances the overall functionality and aesthetics of their bathroom.

At ALSS Bathrooms, we understand the cost allocations for owners corporations and individual owners in these situations. Our team is well-versed in building by-laws, differentiating between common and individual property, and navigating technicalities.

We collaborate with you to deliver a compliant and stress-free service, ensuring a smooth renovation process. All our renovations are backed by a 10 year warranty.
