Colour Packaging

- * 100% water soluble plastics bags (wrapped in paper for ease of handling)
- * Plastic pails
- * Low-melt plastic bags
- * Standard paper bags
- * Bulk packaging

- Finishing Techniques:
- * Broom or Coving Trowel Finishes
 - * Exposed Aggregate
 - * Polished Concrete
 - * Honed Concrete
 - * Saw cuts and grooved finishes

- Colours pigments are:
- * Non-hazardous
 - * Fade resistant
 - * UV and alkali stable
 - * Insoluble in water

Sealer:

Give your project a complete professional finish by applying some of our concrete sealer. Clear or coloured sealers are available to compliment our range of pigments. Colour sealers are available in varying gloss levels including, matt, gloss high gloss, petrol resistant and invisible.

Superior Quality and Performance:

Eureka Concrete take pride in providing a variety of industries with excellent quality products and second to none customer service. Our materials are carefully selected from the finest available resources then blended to suit the clients individual needs.

Our products are created using computer controlled, stainless steel equipment ensuring accurate consistency from batch to batch. All products are labelled with dates and numbers ensuring optimum quality controlled procedures.

Specialised Service:

Eureka Concrete provide an exciting array of concrete products. We can create to your requirements. Whether your project be residential, commercial, industrial, small or large, our consultants are more than happy to discuss your project, to ensure you receive friendly professional advice.

The colours represented on these cards are as accurate as printing process allows but is simply a guide only. All information and knowledge provided herewith is offered in good faith by Eureka Concrete colours. All content is provided herewith is without warranty, representation, inducement or license and these colours do not assume any legal responsibility for reliance on its content. Eureka Concrete will do the best of their ability, provide excellent quality products and customer service. The information contained herein is subject to change without notice. Colours may vary on screen depending on screen settings and quality. If this brochure is downloaded and printed, this may not print to the exact colour and customers should contact the Eureka Concrete team for further information.

Coloured Cement :

The world has seen coloured pigments used for thousands of years and the colourfastness and durability have stood the test of time. Eureka Concrete provides an exciting range of natural and synthetic coloured pigments to enhance the look of your project.

Pigments can withstand the heaviest traffic and the harshest Australian climate whilst offering builders, bricklayers, paviours, architects, landscape gardeners and planners the most exciting arrangement of shades available.

Additional Rates:

The colours contained in the brochure can be produced by adding additional pigments to each cubic metre (m³) of 25 MPA strength concrete. (For colours with a lower specific gravity, two smaller bags will be provided for ease of handling and to comply with OH&S requirements).

Variations in colour can occur, due to different finishing and/or slump practices, cement or aggregate changes in different regions.

Quality Control:

Colour pigments are blended using strict quality control standards.

Finishing Techniques:

Different methods of finishing can give concrete that special look including textured and slip resistant surfaces. At Eureka Concrete we recommend that when using different techniques, seek the advice from one of our concrete professionals prior to commencing your project.

Exact Colour Requirements:

Where an exact colour is essential, we recommend that concrete test panels be completed using the intended raw materials and finishing techniques then inspected after the sample has cured for a minimum of 14 days, ensure Eureka Concrete has made every effort to produce the best examples of coloured concrete using pigments from this brochure. Whilst we guarantee the quality of our product, Eureka Concrete cannot guarantee the colour.
