

Aus Coast Diving & Marine Capability Statement

<http://auscoastdivingandmarine.com.au>

Company Overview

Our commercial diving team is trained and equipped to handle any situation, no matter how murky or deep the water may be. We are qualified in small projects and larger-scale needs like installing pipelines at the bottom of rivers and oceans. We are experienced at both inland and coastal/offshore underwater projects. We are a professional, nationwide commercial dive company and our experience can help you

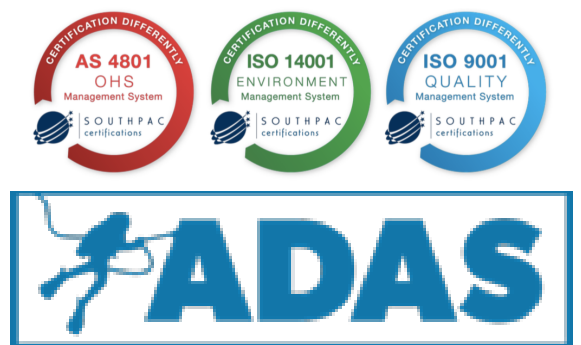

Aus Coast Diving and Marine have the ability and capacity to provide services globally, regardless of where our projects take place in the world, safety and professionalism is always held as the highest precedence.

Aus Coast Diving and Marine are leaders in the field of health, safety, environment and quality. This is proven with our maintained accreditation in the relevant sectors.

Divers employed by Pacific Marine Group all have Australian Diver Accreditation Scheme (ADAS) cards and are qualified to Part II or higher of the AS2815 training standard.

ACDM has in place all relevant company insurances including Public Liability, Worker's Compensation and relevant marine policies.

Services

Industrial Diving: Aus Coast has long offered a variety of industrial diving services. Our specialties include cleaning intake and outfall systems, cooling towers, settling ponds, pipeline networks and wet wells. If you need help with underwater cleaning, maintenance, repair or construction, we are prepared to tackle projects of any scope.

Underwater Inspections: Understanding what further work a project may require often means facilities must first be carefully inspected. Conducting these kind of underwater surveys may be difficult given murkiness and other underwater obstacles our team is trained on all aspects for this.

Underwater Pipeline, Tunnel & Outfall: Pipelines, tunnels, outfalls and related structures often require significant construction, maintenance and repair. In addition to a wide range of industrial equipment, these projects also require skilled divers. Aus Coast ensures that our divers are prepared for these kinds of jobs.

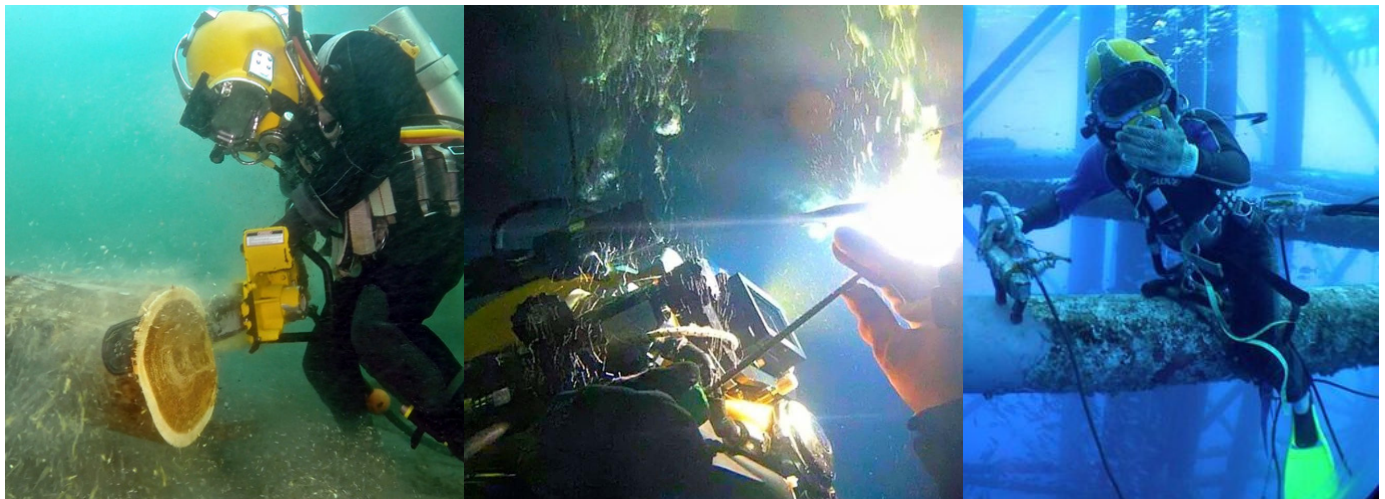

Marine Salvage: Recovering objects or debris from the bottom of oceans, rivers or smaller bodies of water requires diving expertise and superior equipment. Aus Coast is prepared for any set of circumstances. We can handle wreck removal, cargo and equipment removal, debris removal, concrete removal and a number of other objects.

Underwater Construction & Maintenance: Underwater construction and maintenance requires the kind of proficiencies that combine traditional building with superior diving expertise. Handling large-scale projects or working on smaller commercial and residential jobs, we are committed to handling every project with equal care.

Reservoir Cleaning: Aus Coast is able to inspect, clean and repair water storage facilities, from potable or grey water storage systems to pools, fire and general water storage. Sediment removal from tanks and larger storage facilities can be completed while the tanks remain online. Our divers are also experts at locating leaks and then sealing these leaks without the need to drain any storage facility. Aus Coast can also provide a ROV (Remote Operated Underwater Vehicle) to conduct inspections where diving is not required or access for divers is not available.

HP Water Blasting: We use a high pressure unit for cleaning: dirty pontoons, slippery boast ramps, canal rock walls, bridges, hulls, growth removal, wharves & jetty's and intakes and filters.

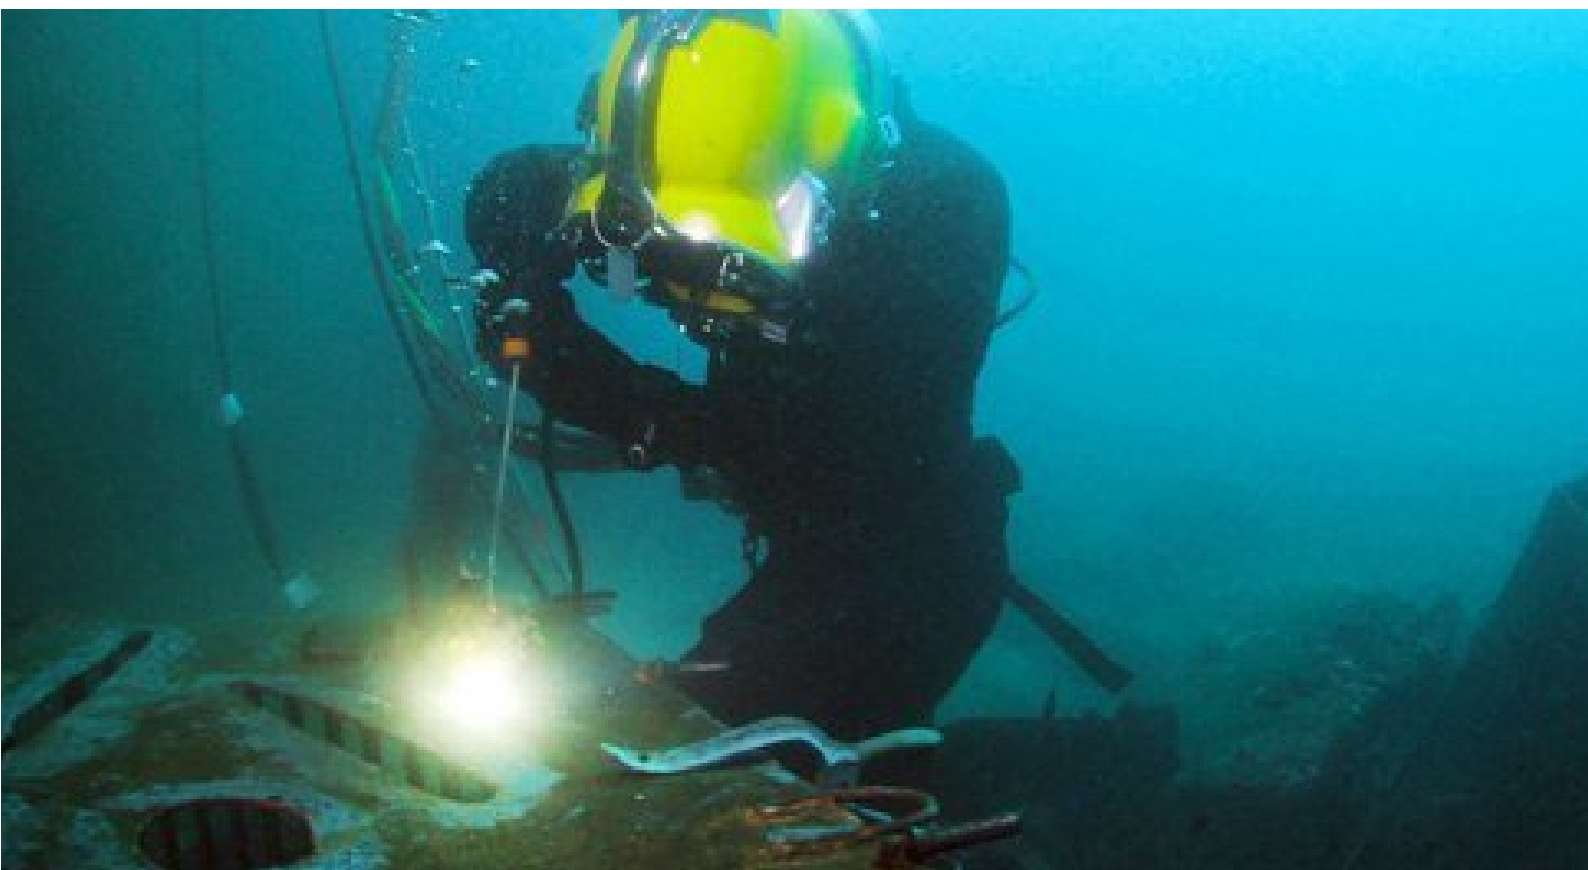

Cutting & Grinding: Aus Coast provide specialist wharf and jetty remediation services. We provide a thorough diving inspection and comprehensive reports which details required repair or demolition strategies. With years of diving construction experience we can provide the accurate details and methods on how best to protect your asset. Aus Coast have pile protection systems for all types of structures: Broco cutting, concrete cutting, chainsaw cutting and grinding. From interstate large industry wharves and jettys to smaller boat ramps, and marina walkways. Aus Coast has experience commercial divers and specialist trade professionals to meet your inspection, maintenance and repair requirements.

Dredging & Seabed Levelling: Dredging is the relocation of underwater sediments, sands and soils for the maintenance / construction of waterways, dams and transportation infrastructures and for reclamation and soil improvements. Large or small Aus Coast can facilitate and complete your job on time and on budget for all types of subsea dredging and seabed levelling.

Inspection & Reporting: Aus Coast provide accurate inspections and easy to understand reports on your asset. Using industry specific techniques we have an excellent format of reporting to give you the overall big picture of what is happening below the surface. We employ qualified crew that are experienced with: Non destructive testing, seabed surveys, core sampling, timber rot, marine growth and cathodic protection.

Hull & Mooring Inspections & Maintenance: Aus Coast will provide prop and hull maintenance and Video inspections. Using hydraulic and pneumatic tools for cleaning and polishing of propellers and intakes. our methods include: prop polishing, hull scrubs, growth removal, anode replacement, intake cleaning & replacement, condition reports, bio hazard inspections.
