

CAPABILITY STATEMENT

ABOUT US

Why we decided to form Pro Belt NT Pty Ltd

The construction industry in the Northern Territory is experiencing remarkable growth, thanks to various infrastructure projects involving the Australian Defence Force, leading construction companies, mining ventures, renewable energy initiatives, railway infrastructure, civil contractors, concrete contractors, landscape contractors and residential developers.

We noticed a gap in the market for subcontractors who can provide their clients with versatility, reliability, and cost savings.

The Telebelt is able to convey any volume of a single material, in a short time, with precise material placement. It allows you to efficiently handle multiple tasks from a single location, with quick setup and cleanup.

All these factors have played a crucial role in the establishment of Pro Belt NT Pty Ltd.

We currently work and live in Darwin, and we couldn't be happier to call this place our home! We've completely fallen in love with Darwin for everything it has to offer. From its amazing climate and rich history to its diverse culture and abundant opportunities - this city has it all!

Why should you consider engaging the services of Pro Belt NT Pty Ltd over traditional methods?

Unleash efficiency and cost savings with the Putzmeister Telebelt TB130. When it comes to tackling construction challenges, the Putzmeister Telebelt TB130 stands head and shoulders above the rest. This versatile machine is the answer to contractors' prayers, offering unrivalled adaptability and cost savings. At Pro Belt NT Pty Ltd, we take pride in presenting you the Telebelt, accompanied by our skilled operators to ensure seamless project execution.

The Telebelt TB130 effortlessly handles a wide array of materials, such as concrete, gravel, sand, and wood, making it the ultimate tool for diverse construction needs. This powerhouse can handle it all. Say goodbye to the limitations of traditional methods and let this technology-driven solution transform your construction site.

As a contractor, you know that time is money. That's why the Telebelt TB130 is designed to expel inefficiencies and maximize productivity. Its telescopic conveyor belt system simplifies material placement, eliminating the need for manual handling and reducing labour costs. With this state-of-the-art machinery and our experienced operators, you'll save substantial time and money on your projects.

In addition to its versatility and efficiency, the Telebelt TB130 paves the way for an eco-friendlier construction industry. Its precise material placement minimizes spills, reducing the environmental impact and the need for costly cleanups. Telebelts do not require priming, and all material can be run off the belts eliminating waste. A highly efficient spring-tensioned carbide scraper system helps to keep job sites clean.

By adopting this technology, you contribute to a sustainable future while simultaneously enhancing your project's bottom line.

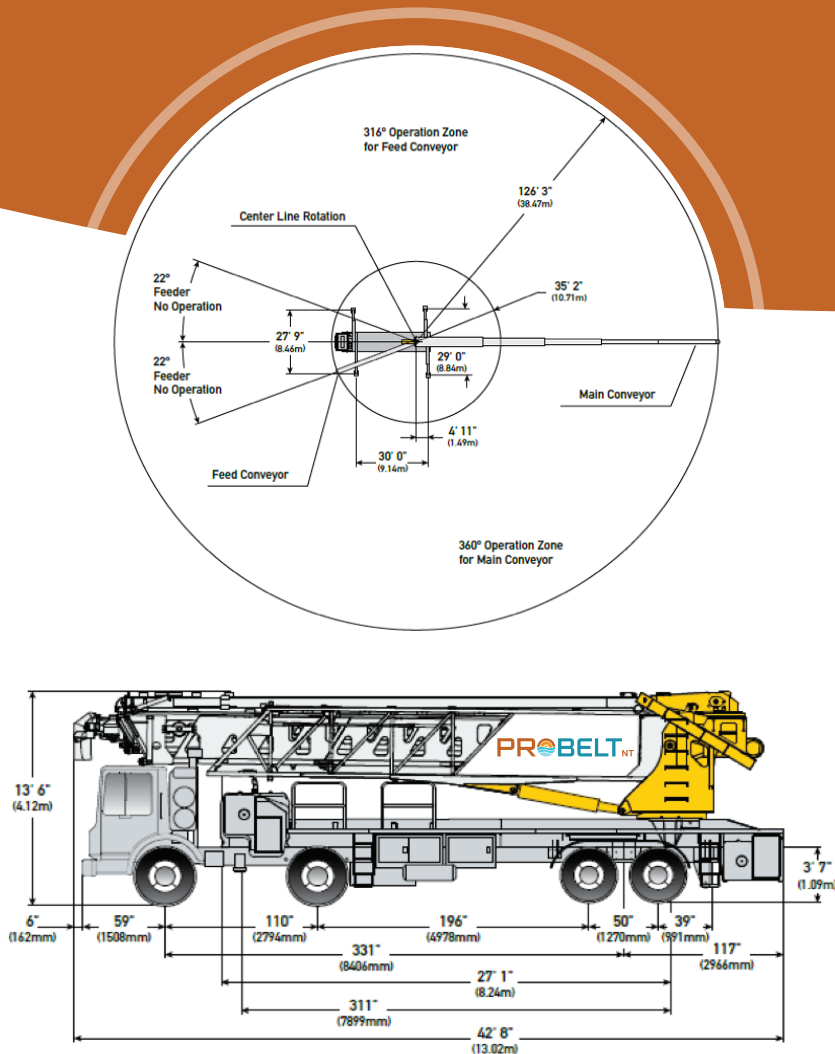

SERVICES PROVIDED

The Telebelt is a game-changer for contractors making it ideal for its countless applications including:

- ✓ Concrete Pours
- ✓ Bridge decks
- ✓ Retaining walls
- ✓ Dams
- ✓ Tilt up pre-cast panels

Elevate your construction business with the Putzmeister Telebelt TB130 from Pro Belt NT Pty Ltd. Benefit from its unrivalled versatility, enjoy significant cost savings, and make a positive difference for the environment.

KEY PERSONNEL

PETER NELSON

Peter has over 37 years of experience in the Concrete Pump Industry. He started his career at the age of 17 as a Concrete Pump Operator and has worked for three of Australia's largest Concrete Pump Companies, where he has worked on commercial and residential sites, as well as mine sites.

Peter has always prioritised safety and the maintenance of machinery during his long career. His dedication to excellence has seen him become a sought-after trainer and mentor for new operators—he has a wealth of knowledge about all aspects of concrete placement, from equipment selection, placement and use through to operational best practice, staff management and health and safety compliance.

KYLIE POLLARD

Kylie has over 35 years experience in office and administrative roles.

For the past 24 years Kylie has worked for the ATO and has extensive experience in leadership roles, compliance roles, working closely with stakeholders, analysing financial reports and budgeting.

Kylie's current position as Administration Manager with a leading Civil & Concreting company in Darwin demonstrates her professionalism and expertise in the field. With a strong focus on effective leadership, she oversees the administration team to ensure efficient operations and that all company paperwork adheres to compliance standards set by our contractors, as well as Federal and State legislation requirements.

Contact us today to discuss your project requirements and let our dependable machinery and skilled operators take your construction endeavours to new heights.
