Coastal

Evoking the spirit of the Australian coastline, our Coastal Collection embodies rugged charm and timeless elegance. Meticulously handcrafted, each stone harmoniously integrates into its surroundings, showcasing unique texture details and rich colour variations.

Choose a seamless, precision-fit look for a bold feature wall that transforms any space, or opt for grouted joints that accentuate the stone's rich texture and deliver a modern, designer finish.

**WHY
CHOOSE
VENEER STONE**

- Ideal for commercial use
 - Architects Choice
- Corners and Capping available to suit all products
- Australian Made and Owned

The rugged authenticity of the Coastal veneer stone will enhance house facades, living room feature walls, fireplace surrounds and outdoor entertaining spaces, suitable for indoor and outdoor applications. With a wide spectrum of natural colours and textures to choose from our stone tiles have been designed based on Australian styles and traditional colours from SA Limestone to the Central Coast Sandstone and Victorian Bluestone.

Please note: all sizes printed are approximate and are subject to change. For current exact measurements please contact Head Office on 02 4606 4907.

Prefabricated corners available for all products.

Estimating Stone Required

When installing with dry joints (dry stacked) add an extra 10-15% to allow for extra cuts and wastage.

Bodies: Calculate the total surface area by square metre.

Corners: Calculate the lineal metres of corner stones required by measuring all external corners from top to bottom.

Please note 1 lineal metre of corners equates to approximately 0.2 m² of surface area. (deductible off bodies)

Veneer Stone estimation calculator
www.veneerstone.com.au/calculator

Random Shade Variation

Extreme colour and texture variation will occur from piece to piece and within each batch for a random look. The look of the final installation will be unique. Please review the range of products before making your final selection.

Approximate Weights

	Bodies	Corners
Coastal Range	50 kg/m ²	12-17 kg per L/m

Application

Suitable for interior and exterior walls, Veneer Stone can be installed around fireplaces, though no closer than 25cm to a naked flame. Veneer Stone can also be installed around wet areas, however, continued exposure to chlorine and other chemicals may eventually affect the colouration of the products. When frequently exposed to water, we recommend protection with Ven Seal Ultra WB sealer.

Corners: There are approx. 10 different shapes and sizes, each box contains a mixture of:

Short Return Range: 70 - 120mm

Long Return Range: 110 - 260mm

Capping: approx. Width 280-300mm x Length 490-510mm, Thickness 35-45mm

Pier Caps: available sizing
 390 x 390mm, Thickness 50mm

Installation

Joint Width: The Coastal collection has been designed to be installed with either a dry joint or an 8 - 20mm mortar/grout joint. When applying the stones use timber or plastic dowels/wedges to keep the joints evenly spaced. Due to the nature of the product stones will vary in size and may need extra wedges to allow for height variation.

Dry Joint Installation Tip: If installing with dry joints please ensure either the wall or adhesive are a dark colour before starting. This can be done by purchasing a dark tile adhesive or tinting mortar with black oxide (check with your local glue supplier). This will help cast a shadow between stones giving a solid dry stone look. The pattern will not line up to the millimetre, you will need off cuts and thin cut stones to fill the voids between the stone once the pattern has been laid.

Individual stones are held together with flexible webbing. Please specify if webbing isn't required when placing order.

Step 1:

- If your application requires corners, apply these first alternating the long & short return in opposite directions
- Cut on trim stones using a wet saw or angle grinder with a diamond blade attached
- Lay 1st layer of product at the base of wall in packaged re-occurring pattern
- Draw a straight line across the 1st layer of stones then cut
- Apply cut stone to wall in packaged re-occurring pattern

Step 2:

Installing with Dry Joint: Take time once the pattern is laid to cut thin stones to fill small gaps between the larger joints. This is very important, it will break up the pattern and provide the perfect hand crafted stone masonry look.

Installing with Mortar Joint: Sand and cement pointing mortar or tile grout can be used to fill the joints. One of the easiest and fastest ways to fill the joints is with a piping bag. Purchase your piping bag from Veneer Stone by calling (02) 4606 4907 or email admin@veneerstone.com.au.

Sealing: To retain the original fresh quarried look we suggest sealing the stone with VenSeal Ultra WB. If you would like the stone to mellow slightly and gain the European look after years of harsh weathering don't seal the product.

Inspired By Nature

We provide an extensive selection of stone veneers to suit even the most discerning tastes. Our range of colours and textures is inspired by native stone, such as McLaren Vale limestone, Victorian bluestone, and Central Coast sandstone. With our offerings, you can achieve a timeless and natural Australian aesthetic that will beautifully enhance any property.

Improves with Age

Inspired in the harsh Australian climate, Veneer Stone ages beautifully. When unsealed, it takes on an historic look after years of weathering. Or, to retain the fresh quarried look and enhance the natural colours, you simply seal the stone with a penetrating sealer.

Unprecedented Style

Our stunning collection of stone veneers allows you to create contemporary or classic designs with the distinctive look and relaxed feel of solid stone walling. Veneer Stone is suitable for tiling over many internal and external surfaces. It's the perfect solution for your stone walling with less impact on the environment than solid stone.

Australian Product

Designed and manufactured in Australia, Veneer Stone is made from a blend of crushed sandstone with less than 1% natural colour pigments. All stone comes in tile form, from 20 to 43 millimetres thick, and is easy to install. Pre-fabricated corners and capping are highly recommended for creating a refined solid stone look.

Veneer Stone is a Family owned business which commenced trading in 1998. We have already undertaken a number of prestigious projects throughout Australia for Architects, Builders, Property Developers, Home Owners and Renovators. We welcome the opportunity to earn your trust and discuss how we can make your ideas become a reality.

Veneer Stone handcraft the highest quality, attractive and easy to install stone veneers. All Veneer Stone products and colours are inspired by native Australian stone. Veneer Stone can be used for residential and commercial applications, both indoors and outdoors.

Veneer Stone is based on the belief that our customers' needs are of the utmost importance. Our entire team is committed to meeting those needs. As a result, a high percentage of our business is from repeat customers and referrals.
