

## INTERNATIONAL COFFEE DAY

### **Trends**

In Australia, coffee isn't just a drink — it's deeply embedded in our lifestyle. Over 55,000 cafés/restaurants were operating in the 2024 financial year — more than over half in NSW and Victoria. Popular drinks include lattes, cappuccinos, and the flat white.

### **Function and flavour**

Coffee is no longer just about strength or roast. Demand for 'functional' coffees — infused with adaptogens or 'superfoods' — is on the rise, along with an appetite for complex flavours (light roasts, fruity origins, unusual pairings).

### **Sustainability**

Farming practices and coffee varieties are adapting for heat-tolerance, drought resistance, lower pesticide use, and environmental traceability. Consumers are welcoming greener packaging, zero-waste cafes, and ethical trade models that benefit growers.

To celebrate  
International Coffee  
Day, we showcase  
the variety of cafes,  
bakeries and  
restaurants and meet  
some of the baristas  
serving your  
favourite brew  
throughout the  
goldfields.
