Glentanner

Glentanner Plan

 Total Floor 305m²

A contemporary statement home where style meets flexibility and family living.

The Glentanner is thoughtfully designed with a layout that features four bedrooms, two bathrooms, and a separate WC. The master suite, complete with tiled ensuite and walk-in wardrobe, is accessed via its own private lounge. At the heart of the home, a central kitchen with a spacious scullery connects seamlessly to dining and living areas that flow to an alfresco space. A double garage and laundry complete the design.

Defined by clean lines and layered materials, this home balances modern design with practical family living.
