WARNING

DANGER – To reduce the risk of electric shock: Always unplug this appliance from the electrical outlet immediately after using and before cleaning.

WARNING – To reduce the risk of burns, fire, electric shock, or injury to persons: 1) An appliance should never be left unattended when plugged in. Unplug from outlet when not in use, and before putting on or taking off parts. 2) Close supervision is necessary when this appliance is used by, on, or near children, invalids, or disabled persons. 3) Use this appliance only for its intended use as described in this manual. Do not use attachments not recommended by the manufacturer. 4) Never operate this appliance if it has a damaged cord or plug, if it is not working properly, if it has been dropped or damaged, or dropped into water. Return the appliance to a service center for examination and repair. 5) Do not carry this appliance by supply cord or use cord as a handle. 6) Keep the cord away from heated surfaces. 7) Never drop or insert any object into any opening. 8) Do not use outdoors. 9) Do not operate where aerosol (spray) products are being used or where oxygen is being administered. 10) To disconnect, turn all controls to the off position, then remove plug from outlet.

Connect this appliance to a properly grounded outlet only. See Grounding Instructions.

This appliance is not intended for use by persons with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety. Keep children under the age of 13 away from this machine.

To reduce the risk of electric shock, this appliance has a polarized plug (one blade is wider than the other). This plug will fit in a polarized outlet only one way. If the plug does not fit fully in the outlet, reverse the plug. If it still does not fit, contact a qualified electrician to install the proper outlet. Do not change the plug in any way.

To reduce the risk of personal injury, read and understand all the instructions before using this product.

User Manual

Make sure that the product is connected to an outlet having the same configuration as the plug. No adapter should be used with this product.

3. Guide for Initial Operation

1. Choose flat ground to place the WalkingPad. It is forbidden to place it on thick and soft cushion. Please note: Don't connect the power before the WalkingPad is fully unfolded.

2. Unfold the walkingpad slowly and press it down to completely flat.

3. Check and adjust the walking belt to make sure it's centered.

4. Connect the power cord and press the button to switch on.

5. Search "WalkingPad" App from Apple Store or Google Play and complete installation.

6. Open the App, follow the prompts to set up the device.

7. Enter Novice Guide.

8. Complete Novice Guide to unlock all Functions (maximum speed 6km/h 3.7 mi/hr). Otherwise the speed limit remains at 3km/h 1.7 mi/hr.

9. Start to use the WalkingPad.

10. If the belt deviates from the orbit in use, please adjust properly.
SEE: 06 Maintenance and Service.

4. Learn to Use WalkingPad

1. Mode instructions

- S** Standby Mode
Light of the Standby mode is on;
Motor and sensor stop responding.
- M** Manual Mode
Light of the manual mode is on;
Control the speed through the remote control or APP.
- A** Automatic Mode
Light of the automatic mode is on;
Speed is automatically controlled by intelligent algorithm.
It follows the speed of walking.

2. Instructions of the standby mode control

Standby Mode

The motor and sensor stop responding in this mode to prevent nonusers from accidentally triggering the WalkingPad.

Mode Switch
Short press: return to the previous mode.

3. Instructions of manual mode control (primary mode)

Manual Mode

In this mode, the speed of the WalkingPad can be controlled by the remote control. It is recommended that beginners use the manual mode first and then use the automatic mode after being skilled in using the WalkingPad. The manual mode is controlled by remote control by default, that is, the START/STOP button of the remote control is used to start or stop the WalkingPad, which can be modified in the client "Personalized".

- ACCELERATION**
Short press: increase speed by 0.25 mi/hr.
- START/STOP**
Short press: start or stop the WalkingPad.
- DECELERATION**
Short press: reduce speed by 0.25 mi/hr.

MODE SWITCH
Short press: switch to automatic mode.
Long press: switch to standby mode.

4. Learn to Use WalkingPad

4. Description of automatic mode control (advance mode)

A

Automatic mode

This is a challenging and higher-class mode, User can walk on the Walkingpad completely out of remote controller. We only recommend those who have good sports skills or walking-device experience to take the challenge.

Short press: stop the WalkingPad.

Mode Switch:
Short press: switch to manual mode.
Long press: switch to standby mode.

5. Remote Control Notice

If the remote control has no response or you change a new one, the remote controller and walking device need to re-establish communication.

Remote control pairing method:

Restart the WalkingPad, press and hold down the mode switch button on the remote control immediately, hearing the sound of "Beep" indicates the success of pairing. Note: During the operation, the remote control should be close to the WalkingPad.

6. Error code

The error code is off when the walking machine is working normally. When error occurs, the display panel of remote shows the error code.

E01: Drive communication fault.

E02: Motor abnormalities.

6. Maintenance and Service

1. Clean the walking machine

- Turn off the machine and unplug the power cord.
- Add several drops of detergent on cotton rag or towel. Don't pour the detergent on the belt directly, and don't use acid or corrosive cleaners.
- Wipe off dust and stains on the frame, front panel and belt. Do not wipe backside of the belt.
- After using for a period, dust and stains may appear on the back part, that is normal and just clean them up.

2. Adjust the belt

- Press and hold both Mode Switch Button and Acceleration Button on the remote control over 3 seconds.
- The walking belt will move at the speed of 4 km/hr (2.5 mi/hr).
- Running belt inclined left: Turn the left adjustment screw 1/4 circle clockwise.
- Running belt inclined right: Turn the right adjustment screw 1/4 circle clockwise.
- Slipping running belt: Turn the left and right adjustment screws clockwise at the same time a half circle.
- Run the running belt for a period of time (1~2 minutes) to observe the centering situation. If necessary, please adjust it again.

3. Lubricate the Belt

- Turn off the machine and unplug the power cord.
- Lift up the belt and apply silicone oil on the backside of the belt.
- Power on the treadmill again to run the running belt at 4km/hr (2.5 mi/hr) for 10-20 seconds.
- 5-10 ml of silicone oil is needed for one time of lubrication.
- If the lubrication is applied too much, the belt will slip and affect normal use.
- Add the silicone oil every 3 months.
