STADIUM STOMP
VOLUNTEER ROLE DESCRIPTIONS

SET UP (pre-event)

This position will give you an insight into what it takes to set up the course and what the participants can expect. Work closely with the Stadium Stomp Operations team to set up the event site. Position bollards and signs to ensure the participants can easily navigate themselves around the course. You will also be assisting with setting up the start line, finish line and expo area.
Note: This position requires stair climbing and potentially some heavy lifting.

REGISTRATIONS

Welcome participants on arrival and hand out their event kits and merchandise. Help stompers find their way around the venue and direct them to the start line. You will be provided with a full brief by your team leader upon arrival.

BAG COMPOUND

Volunteers in this area will be responsible for collecting, storing and retrieving participant's bags. All participants will have a tag they will need to hand in on storing their personal bags (tear off from their bib). Participants will only be able to collect their bag/s from the bag compound on presentation of their bib.

COURSE MARSHALL

Be the cheer squad on the course and give Stompers an extra spring in their step with motivational encouragement. You'll help with directional support or hand out water at hydration stations, and keep a look out for any hazards or first aid requirements on course. Keep the fun event atmosphere going!
You will be supported by a dedicated Team Leader who will provide you with a full brief upon arrival.

AREA LEADER

Area Leaders are allocated a specific area of the course and are responsible for briefing and supervising a small team of volunteers within this area. The Area Leaders will be expected to take ownership of their allocated 'sector' and will be required to work closely with Event Operations to report any incidents or issues that may arise. This role is best suited to someone with leadership/event experience.

FLOOR MANAGER

You will help to keep the MC on schedule and assist him/her in keeping to the run sheet. MC will be fully briefed so your role is largely to assist him/her as required. This may require using a radio and communicating with AV to coordinate switches from stadium music to MC speaking on a microphone. Also, assist MC in handing out prizes in the marshalling space if he/she needs assistance.

START LINE

Help participants at the start of their Stomp and make sure everybody starts in their allocated wave time. Each participant will be wearing a bib with a number on it which indicates their wave time. You will make sure that participants start in their correct wave and that they are marshalled when required. Start Line volunteers may also conduct a short briefing for all participants before they start.

FINISH LINE

Celebrate when participants cross the finish line! You will hand out medals and give finishers the opportunity to grab a piece of fruit and water before moving through to celebrate with friends and family.

PHOTOGRAPHER / VIDEOGRAPHER

You have an interest in photography or videography and have your own equipment. Photos you make at the event will be shared on Facebook and used for the following year's promotions.
