

OCCUPATIONAL THERAPIST

My name is Chris and I graduated from St Bede's College in 2015. I went straight to University, being accepted into a Bachelor of Occupational Therapy at Monash University. I am currently completing my 3rd year within the course and am loving my time at university. Although Occupational Therapy plays a very important role in people's lives, not a lot of people actually know what it is, so my goal is to try and help promote OT as much as possible throughout my career. Although I am currently unsure of which area of Occupational Therapy I want to specialise in, I know that there is a range of opportunities available, which is an exciting prospect for my future.
