**TO THE
NEXT LEVEL**

RP RosterPro

RosterPro

Make every shift count

Crafted by site administrators, RosterPro simplifies the complex task of scheduling employees and contractors for specific shifts on-site. Streamline your workforce communication and effortlessly react to last-minute changes with ease.

Roster pro seamlessly connects you workforce and leverages TKN's mobile Time Management, Communications and On-boarding applications, driving roster automation and taking workforce management to a whole new level. Powered by the TKN's award winning cloud platform,

"Currently scheduling tools that are available on the market are lacking in multiple areas, when dealing with mine site rostering complexities. Forcing our team to revert to Excel as the most practical program. We currently use multiple tools to service our needs and none of these tools integrate with each other making our processes inefficient.

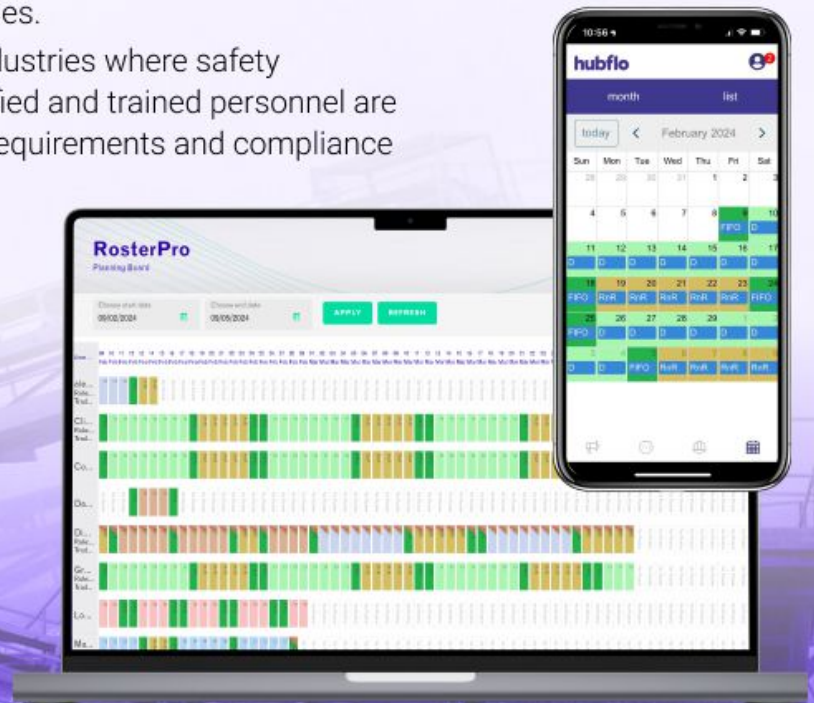

Having an all-in-one scheduling tool that covers all our needs will speed up our processes and streamline our scheduling processes."

Unlock your workforce

- **Cost Savings:** Flexible and efficient rostering maximise resource allocation and improves response to schedule variations.
- **Workforce automation:** automate repetitive back office operations and ensure valuable time is spent where it counts most
- **Improved utilisation:** ensuring you get the most out of your team, while managing fatigue, overtime and employee well being
- **Employee Satisfaction:** Visible, well-organized rosters contribute to better work-life balance for employees, as they have clear visibility into their schedules, leading to increased job satisfaction and morale.
- **Improved Service levels:** by adapting your roster quickly to ensure customer requirements can be met
- **Data-Driven Decision Making:** Rosters generate valuable data that can be analyzed for trends, helping in making informed decisions to improve workforce management strategies.
- **Enhanced Safety and Compliance:** In industries where safety protocols are crucial, ensuring that qualified and trained personnel are assigned to tasks that align with safety requirements and compliance standards.
