Appendix A

Business Grade Internet Service Levels

The key difference between the Business Grade internet service offered by Exetel is that the business grade services are delivered on network infrastructure and when a problem within that network occurs the faults are defined and resolved within the timeframes of a Service Level Agreement appropriate to a business user dependent on the internet for the operation of their business processes.

While Exetel does provide a highly reliable residential NBN services there are no service levels on that network and fault restore time can almost never be achieved in better than 36 hours.

Exetel provides its Business Grade services using the

Networks of NBN Co, Optus Wholesale, Telstra Wholesale, TPG Wholesale amongst other parties. While Exetel Pty Ltd will enter into a service level agreement with an end user Exetel's ability to deliver services under such an agreement are dependent on the performance of these networks to a very large extent which are provided with the following service level guarantees.

1. Service Level Offered

a) Objectives

Exetel will provide designated service up times which are measured on a calendar monthly basis. In the event that Exetel Pty Ltd does not deliver the service covered under the SLA at the level(s) guaranteed then a schedule of rebates of the monthly access fee will apply.

b) Service Availability

2. Pro-Active Notifications

Major Outages

In the event that a network outage should occur with the potential to impact multiple End Users, Exetel will when possible, proactively communicate to Customer with SMS and email as follows:

Notifications will be via:

- * SMS with summary details for a limited number of customer contacts.
- * E-mail with more detailed information for all nominated customer contacts.

It is the customers' responsibility to ensure that Exetel has the correct and current list of nominated contacts and their contract details at all times.

Planned Service Outages

Exetel will use best efforts to provide 5 working day notification of any scheduled or planned service outage to affected customers. Where practicable, planned service outages will occur from 1am local time in the affected state, the planned service outage may happen any day of the week.

The process for notifying customers of planned service outages will be as follows:

- * Exetel may plan a service outage to conduct necessary maintenance and upgrade to its network. Planned service outages may also originate from 3rd party carriers who are providing services to Exetel.
- * Exetel will notify all effected customers via e-mail.

The e-mail will include details of the planned service outage.

In circumstances where an emergency service interruption is required, Exetel reserves the right to undertake the service interruption without notice. In such cases Exetel will use best

efforts to notify the customer prior to any service interruption.
Notification via the SMS facility (as described above) may be used in case of an emergency service interruption.

3. Service Credit Calculation

Service Levels are measured on a calendar monthly basis. The Credit per Outage will be a percentage set out in the table below of the recurring monthly charges that are payable by the customer for the calendar month in which the line outage occurred:

Service Level Table				
Credit Service	0%	10%	15%	20%
Network availability	100-99.95%	99.94-99.50%	99.49-99.00%	Under 99.00%

For the purpose of determining packet loss and latency SLA's Exetel will use the 'worst hour average' method:

- the 'worst hour' is the worst result for any hour over a 24 hour period
- 10 test packets are sent between designated points every minute
- the SLA determination will be the average return time of those packets over one hour

For international SLA measurement, the 'Entry Point' is defined as the first device reached on the route path within the destination country.

SLA Schedule

			Claimable SLA Refund Within any Month where 'Worst Hour' Performance is Not Met.
