<sup>1</sup> Typical evening speeds are based on the download and upload speed test results of existing customers between 7pm and 11pm and are subject to change. Actual download and upload speeds may be lower due to many factors including your network configuration, the location and type of content, the number of users simultaneously accessing the network, and the performance of third-party interconnection infrastructure that Exetel does not monitor or maintain. We will inform FTTB, FTTN and FTTC customers of their actual download speed once connected, and you will have the option to downgrade to a lower speed plan without penalties. Superfast nbn and Lightspeed nbn are only available at FTTP and limited HFC technology locations. WIFI connected devices may have slower speeds than Ethernet connected devices. Things that can affect your Fixed Wireless nbn™ service speed All speeds are best effort and are not guaranteed. Factors such as distance, weather, interference or technical limitations may prevent the fixed wireless signal from achieving maximum speeds.

### Information About The Service

Exetel's nbn™ Broadband Service delivers high-speed broadband internet over the National Broadband Network's Fibre Optic, Hybrid Fibre Coaxial and Copper Infrastructure to the Network Boundary Point at your premises. Fibre services include Fibre-to-the- premises (FTTP), Fibre-to-the-Node (FTTN), Fibre-to-the-basement (FTTB), Fibre-to-the-curb (FTTC) and Hybrid Fibre Coaxial (HFC).

Exetel's nbn™ Fixed Wireless service is only available within an nbn™ Fixed Wireless service area. Standard installations are completed without charge to you. Non-standard installations may require you to pay additional charges.

### Mandatory component of the service

There are no mandatory components of the Exetel nbn™ FTTP Fibre Broadband service. For FTTN and FTTC connections, an in-place copper telephone line will be required from the nbn™ node to your premises, and for FTTB connections, from the MDF in your building basement.

Exetel nbn™ Broadband services are supplied as pure stand- alone broadband service including a free VoIP Direct In Dial Number (DID) so you can either port your current home phone number to Exetel (if you have one) or we can assign you a new one. This VoIP service can be used to make and receive phone calls over your Exetel broadband service. Call charges apply. If you cancel your Exetel nbn™ Broadband service, access to your Home Phone (VoIP) service will be cancelled also.

### Minimum Contract Terms

nbn™ Broadband service: No Lock-in

Optional Unlimited Home Phone Call Pack: 1 month

### Limitations/Qualifications for the service

Exetel nbn™ Broadband may not be available in all areas or premises. There may be technical or commercial reasons that affect our ability to connect a service at your address. Please visit the Exetel website to check your service availability or contact our Residential Sales Team on 13 39 38. Customer Service Guarantee does not apply to Home Phone or nbn™ services.

### About Speeds

The nbn™ speed tier for your service is the theoretical maximum speed of the access line connecting your premises to the nbn™. The actual speeds you experience, particularly during busy periods, may be limited by demand in other parts of the network and will typically be much slower. For more information, please visit our website.

Not all FTTN, FTTB or FTTC access lines support all speed tiers. Exetel cannot confirm your maximum access line speed until after your service has been installed. Once your service is installed and activated, your maximum access line speed will be tested. If your line will not support your chosen speed tier, we will inform you and offer move you to a lower speed tier and refund any extra money you have paid for the higher speed tier.

### Information About Pricing

#### Free activation

Where advertised as such the broadband activation fee only is free.

Depending on the service ordered, there may be additional up-front charges which will be charged as per our Terms of Use. These charges

include, but are not limited to, charges such as Phone Line Activation Fee or Copper Line Installation Charges, Lead-in or Additional Cabling, Equipment Charges such as Modems, Routers or Splitters, Missed Appointment Fees or any complex on site work required to provide a functional broadband service.
