

ANY: Subjective fevers, or chills, fever >99.9F, cough, sore throat, shortness of breath, trouble breathing, body/muscle aches, diarrhea, severe fatigue
OR a constellation of less-specific symptoms (e.g. headache, new loss of taste or smell)

YES

Put on a surgical mask on patient and move to appropriate isolation area. Follow PPE guidance for suspected COVID.

SEVERE symptoms requiring hospitalization?

YES

911 or ED

Warm hand-off if at WLA, call 310-268-3169

NO

Optional Testing

Test for COVID19 with appropriate PPE upon patient request*

* While testing should not be denied to anyone, it is particularly relevant for persons with possible COVID-19 exposures or who live or work in a group setting (e.g. nursing home, homeless shelter, etc.). Testing is most accurate 4-7 days after exposures.

Outpatient* P.U.I.

Test for COVID19 with appropriate PPE and give instructions for home isolation*

* On-campus housing is available at West LA for homeless patients.
