Duty of Candour Masterclass: A Step-by-Step Guide from Adverse Events to System Learning

When a patient safety event occurs, how do hospitals and health services respond - and what can we learn from the process?

This 3-hour masterclass brings together medical and legal perspectives to examine how adverse events are identified, reviewed, and communicated. Drawing on real-world examples, we'll explore what happens from the moment an incident is classified through to open disclosure, regulatory reporting, and review.
